PRESS RELEASE

ROSS Canada® Announces Acquisition of UBSafe!

Ontario, Canada – ROSS Canada Inc., a wholly owned subsidiary of ROSS Controls (ROSS), is very pleased to announce the acquisition of a majority position in UBSafe Inc. (<https://www.ubsafe.ca/>). UBSafe is a service provider for industrial workplace machine safeguarding, based in British Columbia, Canada. This acquisition enables ROSS, the Global Leader in Fluid Power Safety, to broaden its safety application expertise beyond product and into safety services.

ROSS Canada, established by ROSS in 2016, is located in Mississauga, Ontario and is centrally located to best serve its original equipment manufacturers and end user customers. In addition to its direct sales team, ROSS Canada markets its safety and machine automation products through an established coast to coast distributor network.

As the global pioneer in fluid power safety solutions and poppet valve technology, ROSS is driven to grow its markets, launch new products on the foundation of innovative technologies, and enhance processes – all built upon its foundation of safety and quality.

UBSafe, founded in 2008, operates on core principles where focus is maintained on the needs of clients, the safety of machinery, and the health and well-being of employees. UBSafe's vision has been to be the best in the world, and to have the greatest possible impact on worker safety around machinery and equipment. UBSafe is well positioned in consultancy and other services including education, design, engineering, and turnkey remediation for industries including pulp & paper, food & beverage, process safety, automotive and others.

Specifically, UBSafe focuses on:

- Safeguarding reports and risk assessments from individual machines to complete facilities
- Machine safeguarding solutions from consulting to turnkey design and integration
- Client-specific safety system training

UBSafe is an active member of CSA Z434, Z142 and Z432 technical committees in development of the standards and have developed a UBSafe Modular Workplace Safeguarding Training System – a comprehensive system for training in risk assessment and CSA standards.
